23<sup>rd</sup> March 2020

Dear All,

The outbreak of the coronavirus (COVID-19) continues to dominate the news headlines. We know so many people are affected in some way either indirectly or directly during this pandemic and we want to send our best wishes to you, your families and your employees during these challenging times. We hope you can stay safe.

In response to this situation, I want to take the opportunity to communicate directly with our valued clients, business partners and co-workers to assure you that Geologix services and support will remain in place during this disruptive time.

Our plan is to follow globally and locally mandated health directives as a precautionary measure. Currently, we are embedding a new pattern of "working from home" for all our staff in our offices around the globe. With respect to client and business partner interactions, we have put in place travel and visitor restrictions and directed that face-to-face meetings be limited to 'business-critical' only. All other meetings will be online using Teams, Skype, Zoom etc.

Geologix has been a leader in well operations software with the GEO Suite in prolific use in over sixty countries spread across the five continents and we have had the ability to train and support our customers remotely over the last twenty-five years. Also, more relevant now than ever is WellXP, our cloud delivered dashboard, that enables our customers to access real-time logs, reports and KPI from anywhere on any device without the need for sending any equipment or personnel to the rig-site.

Our commitment to support and excellence remains undiminished. We are investigating mechanisms to ensure that you receive the same level of support as you had before the coronavirus outbreak.

We look forward to remaining in close and regular online contact in the coming weeks and to seeing you again when this Coronavirus outbreak has run its course. In the meantime we remain committed to supporting your operations. We thank you for your continued trust in Geologix.

With kind regards,

Samit Sengupta  
Managing Director
